**INTERLINK Care Management, Inc. (CancerCARE for Life) partners with Talkspace, a leading online behavioral healthcare company, to support cancer patients and survivors.**

HILLBORO, OR (July 10, 2025) – As part of our commitment to whole-person care, INTERLINK Care Management, Inc. is proud to partner with Talkspace to provide compassionate, specialized mental health support for cancer patients and survivors.

CancerCARE for Life is built to enhance cancer outcomes and empower individuals to take charge of their health. Centered around the four core pillars of prevention, early detection, management, and survivor support, the program offers a comprehensive approach that includes targeted education, 24/7 access to oncology-trained nurses, and a strong network of Centers of Excellence (COE), delivering exceptional care and support to every member.

The partnership with Talkspace will bring convenient online access to therapy and self-guided mental health support to cancer patients and survivors. Talkspace connects members with a licensed provider within days, and they communicate through messaging, virtual sessions, or a combination, all on a secure, HIPAA-compliant platform.

*"The integration of Talkspace into the CancerCARE for Life program represents a strategic enhancement of our member services," said Dr. Oscar Bronsther, Chief Medical Officer. "This collaboration enables our nursing team to deliver more individualized care by facilitating timely access to behavioral health resources, ultimately supporting improved patient outcomes."*

CancerCARE for Life services are used by large employers, captives, TPAs, and life insurance companies as an embedded benefit for employees and policyholders.

Talkspace (NASDAQ: TALK) is a leading virtual behavioral healthcare provider committed to helping people lead healthier, happier lives through access to high-quality mental healthcare. All care offered at Talkspace is delivered through an easy-to-use, fully encrypted web and mobile platform that meets HIPAA, federal, and state regulatory requirements. Millions of Americans have access to Talkspace through their health insurance plans, employee assistance programs or as a free benefit through their employer, school, or government agency.
